Precision Wire Stripping & Cutting Blades | Custom Industrial Machine Blades JW-BL07

Model No. JW-BL07

SPECIFICATIONS

Blade Type	Precision Stripping & Cutting Blade
Compatibility	Wire Stripping Machines, Cable Cutting Machines
Models Supported	305 Horizontal Skinning Machine, 310 Accessories, 315 Flat Knives
Blade Variants	V Knife, Round Knife, U Knife, Otp Blade, Stripper Blade
Customization	Available (Provide Machine Name & Information)
Application	Industrial Cable Harness Manufacturing

JW-BL07 is a replacement blade line for wire stripping machines and cable cutting machines, covering the 305 horizontal skinning machine, 310 accessories and 315 flat knives. It is the blade only, ordered by machine and by the cut the customer needs, for machines already in service.

The range covers V knife, round knife, U knife, OTP blade and stripper blade forms. The V and U forms are inserted-tip blades: the cutting point is a separate harder piece set into the body, with two slotted feet below for height adjustment in the holder. That construction lets one body serve several notch sizes and keeps the cutting angle fixed as the tip is dressed. Round and OTP forms are supplied to the machine pattern, because the notch radius or the OTP opening has to match the wire and terminal in use.

Blades are made to order from the machine name and the information the customer supplies - a sample blade, a drawing, or the wire and insulation dimensions. This suits mixed fleets where several machine types run the same cable, and it is the usual route when an original blade is no longer available.

Key Features

1. Variants: V knife, round knife, U knife, OTP blade and stripper blade, covering stripping and cutting positions.

2. Inserted tip: the V and U cutting points are a separate harder piece set into the blade body.

3. Adjustment: twin slotted feet below the body allow height setting in the holder.

4. Machine coverage: 305 horizontal skinning machine, 310 accessories and 315 flat knives.

5. Custom build: blades are produced from the machine name and the supplied sample or drawing.

6. Replacement role: a spare blade for machines in service, fitted without machine modification.

Technical Specifications

Parameter	Specification
Model	JW-BL07
Type	Precision stripping and cutting blade
Variants	V knife, round knife, U knife, OTP blade, stripper blade
Compatibility	Wire stripping machines, cable cutting machines
Models supported	305 horizontal skinning machine, 310 accessories, 315 flat knives
Fixing	Twin slotted feet (photo)
Customization	Available, on machine name and information
Application	Industrial cable harness manufacturing

Applications

— 305 horizontal skinning machines - replacement V and round knives for jacket and insulation stripping.

— 310 stripping machine accessories, where the blade is matched to the existing holder.

— 315 flat knife stations cutting flat cable and ribbon.

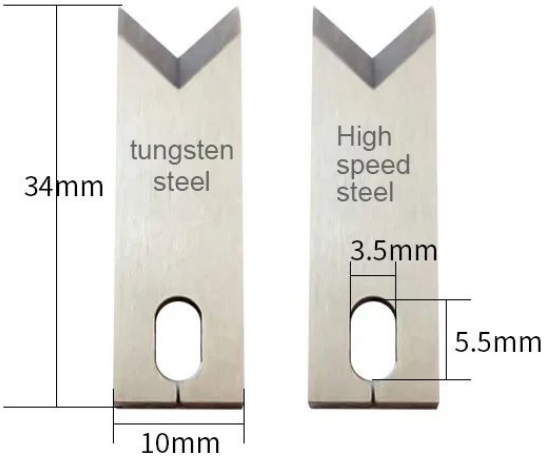

— Cable cutting machines that need a straight cutting blade rather than a notching profile.

— Mixed machine fleets running one cable type, where blades are ordered together to one specification.

Product parameter

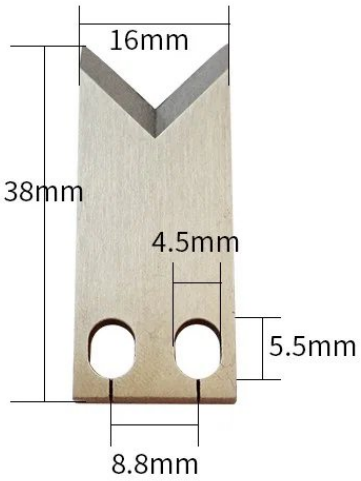

1 220 Computer cutting machine blade

Length 34*width 10*thickness 2.5mm

2 508 computer cutting machine blade

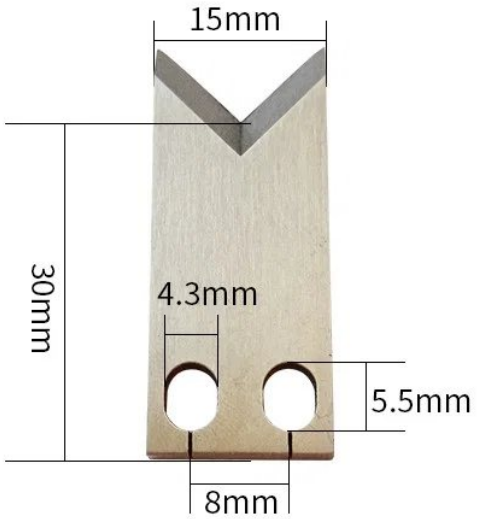

Length 38*width 16*thickness 3mm

3

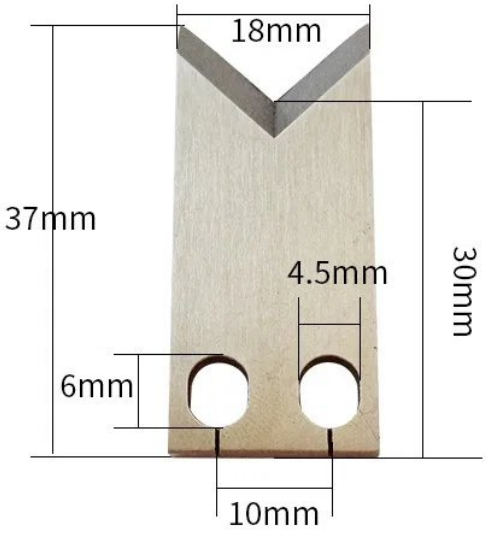

Single wire machine blade

Length 37*width 15*thickness 2.5mm

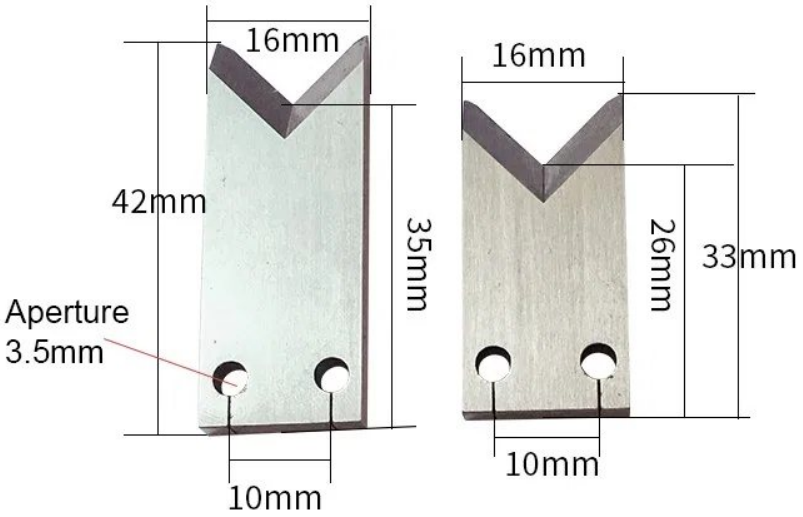

4

Length 37*width 18*thickness 2.5mm

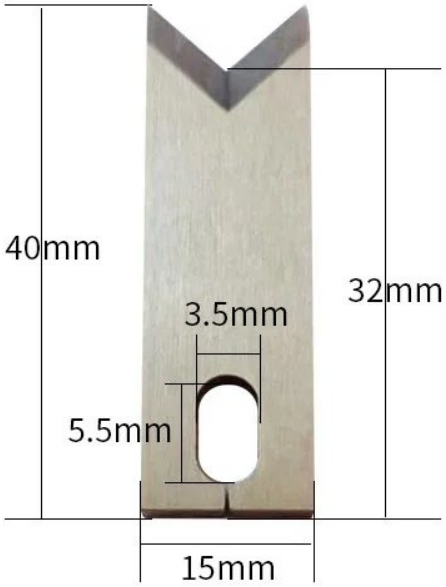

5

Long knife: length 42*width 16*thickness 3mm
Short knife: length 33*width 16*thickness 3mm

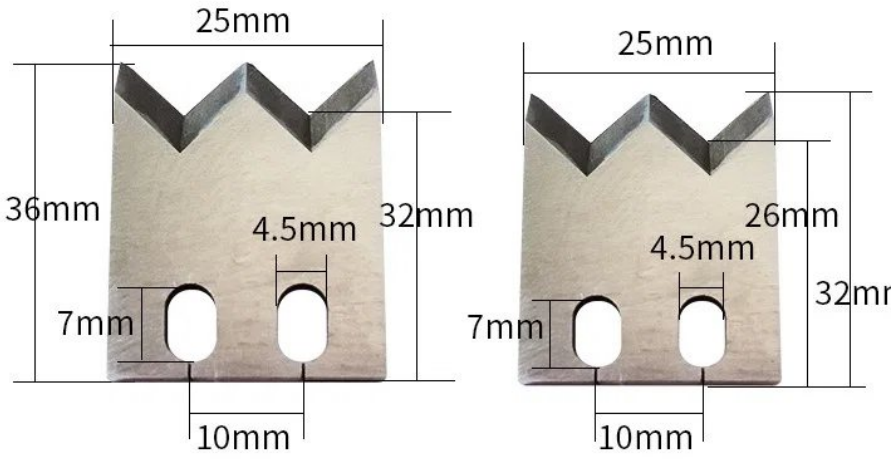

6

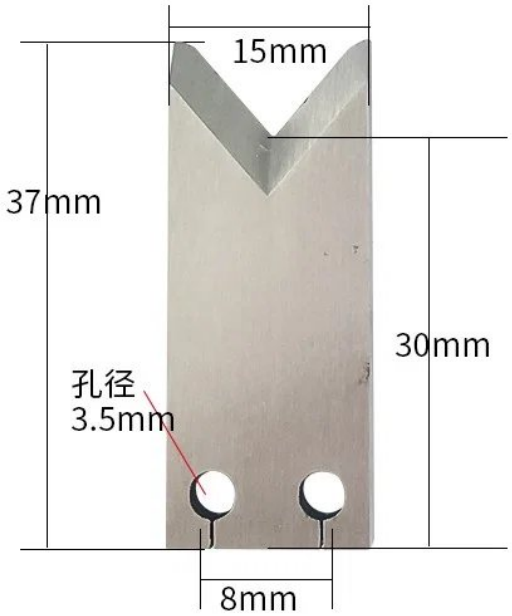

Length 40*width 15*thickness 2mm

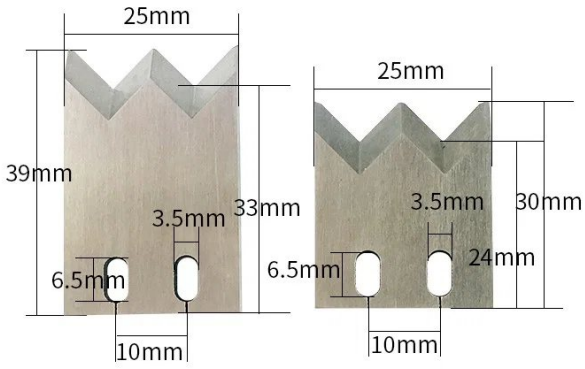

7 Long knife: length 36*width 25*thickness 3mm
Short knife: length 32*width 25*thickness 3mm

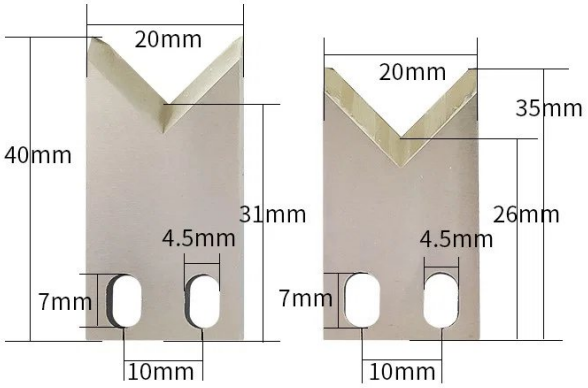

8 Length 37*width 15*thickness 2.5mm

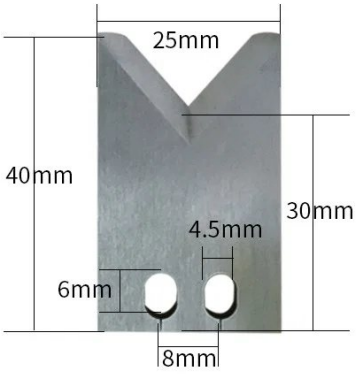

9 Long knife: length 39*width 25*thickness 3mm
Short knife: length 30*width 25*thickness 3mm

10 Long knife: length 40*width 20*thickness 2.5mm
Short knife: length 35*width 20*thickness 2.5mm

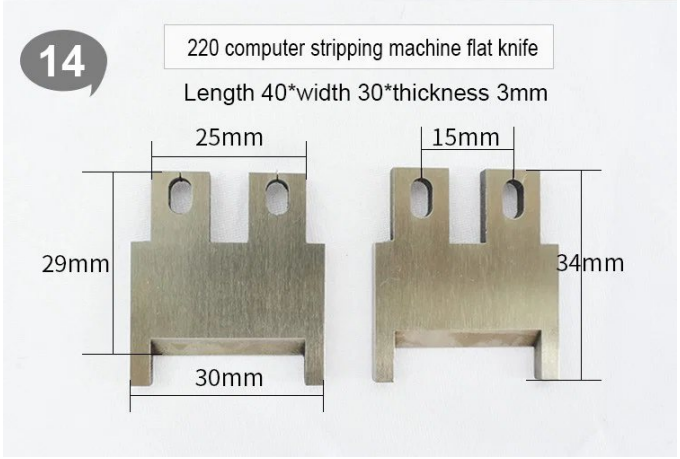

11 Length 40*width 25*thickness 3mm
